

A guide to water savings

How much water can I save with  flush-wiser®

Each incremental setting, 1 to 5 will save you approximately 10% of the whole volume of water in your cistern.

Example 1: if your cistern holds 9 Litres and you use setting 1 you will save 900ml

Example 2: if your cistern holds 7 Litres and you use setting 1 you will save 700ml

Example 3: if your cistern holds 9 Litres and you use setting 2 you will save 1.8L

Example 4: if your cistern holds 7 Litres and you use setting 4 you will save 2.8L

Setting	% Saving	Cistern Size	
		9L cistern water saving	7L cistern water saving
1	10%	900ml	700ml
2	20%	1.8L	1.4L
3	30%	2.7L	2.1L
4	40%	3.6L	2.8L
5	50%	4.5L	3.5L

N.B.: Water savings are approximate and dependent upon cistern size, siphon and toilet type
The figures quoted above are for guidance and the required setting should be established by trial and error during installation of the device.
